

## PIG-F Polyclonal Antibody

Cat No: HR1AP7697

For research use only

### Overview

Product Name	PIG-F Polyclonal Antibody
Source	Rabbit
Applications	IHC-p,ELISA
Species Reactivity	Human,Mouse
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	kDa
GeneID?Human?	PIGF
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	PIGF; Phosphatidylinositol-glycan biosynthesis class F protein; PIG-F; GPI11 homolog
Background	<p>phosphatidylinositol glycan anchor biosynthesis class F(PIGF) Homo sapiens This gene encodes a protein involved in glycosylphosphatidylinositol (GPI)-anchor biosynthesis. The GPI-anchor, a glycolipid containing three mannose molecules in its core backbone, is found on many blood cells where it serves to anchor proteins to the cell surface. The encoded protein and another GPI synthesis protein, PIGO, function in the transfer of ethanolaminephosphate to the third mannose in GPI. Alternatively spliced transcript variants encoding different isoforms have been described. [provided by RefSeq, Jul 2008].</p>
