

IFN- γ Polyclonal Antibody

Cat No: HR1AP3704

For research use only

Overview

Product Name	IFN- γ Polyclonal Antibody
Source	Rabbit
Applications	WB,IHC-p,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	17kDa
GeneID?Human?	IFNG
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	IFNG; Interferon gamma; IFN-gamma; Immune interferon
Background	<p>interferon gamma(IFNG) Homo sapiens This gene encodes a soluble cytokine that is a member of the type II interferon class. The encoded protein is secreted by cells of both the innate and adaptive immune systems. The active protein is a homodimer that binds to the interferon gamma receptor which triggers a cellular response to viral and microbial infections. Mutations in this gene are associated with an increased susceptibility to viral, bacterial and parasitic infections and to several autoimmune diseases. [provided by RefSeq, Dec 2015],</p>
