

Cleaved-Cathepsin L1 HC (T288) Polyclonal Antibody

Cat No: HR1AP2140

For research use only

Overview

Product Name	Cleaved-Cathepsin L1 HC (T288) Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	30kDa
GeneID?Human?	CTSL1
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	CTSL1; CTSL; Cathepsin L1; Major excreted protein; MEP
Background	<p>cathepsin L(CTSL) Homo sapiens The protein encoded by this gene is a lysosomal cysteine proteinase that plays a major role in intracellular protein catabolism. Its substrates include collagen and elastin, as well as alpha-1 protease inhibitor, a major controlling element of neutrophil elastase activity. The encoded protein has been implicated in several pathologic processes, including myofibril necrosis in myopathies and in myocardial ischemia, and in the renal tubular response to proteinuria. This protein, which is a member of the peptidase C1 family, is a dimer composed of disulfide-linked heavy and light chains, both produced from a single protein precursor. Multiple alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Apr 2012],</p>
