

N-CoR Polyclonal Antibody

Cat No: HR1AP9185

For research use only

Overview

Product Name	N-CoR Polyclonal Antibody
Source	Rabbit
Applications	WB,IHC-p,IF,ELISA
Species Reactivity	Human,Mouse
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	270kDa
GeneID?Human?	NCOR1
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	NCOR1; KIAA1047; Nuclear receptor corepressor 1; N-CoR; N-CoR1
Background	nuclear receptor corepressor 1(NCOR1) Homo sapiens This gene encodes a protein that mediates ligand-independent transcription repression of thyroid-hormone and retinoic-acid receptors by promoting chromatin condensation and preventing access of the transcription machinery. It is part of a complex which also includes histone deacetylases and transcriptional regulators similar to the yeast protein Sin3p. This gene is located between the Charcot-Marie-Tooth and Smith-Magenis syndrome critical regions on chromosome 17. Alternate splicing results in multiple transcript variants. Pseudogenes of this gene are found on chromosomes 17 and 20.[provided by RefSeq, Jun 2010],
