

Arylsulfatase E Polyclonal Antibody

Cat No: HR1AP7307

For research use only

Overview

Product Name	Arylsulfatase E Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	65kDa
GeneID?Human?	ARSE
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	ARSE; Arylsulfatase E; ASE
Background	<p>arylsulfatase E (chondrodysplasia punctata 1)(ARSE) Homo sapiens Arylsulfatase E is a member of the sulfatase family. It is glycosylated posttranslationally and localized to the golgi apparatus. Sulfatases are essential for the correct composition of bone and cartilage matrix. X-linked chondrodysplasia punctata, a disease characterized by abnormalities in cartilage and bone development, has been linked to mutations in this gene. Alternative splicing results in multiple transcript variants. A pseudogene related to this gene is located on the Y chromosome. [provided by RefSeq, Sep 2013].</p>
