

## PERQ2 Polyclonal Antibody

Cat No: HR1AP12550

For research use only

### Overview

Product Name	PERQ2 Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human,Mouse
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	142kDa
GeneID?Human?	GIGYF2 KIAA0642 PERQ2 TNRC15
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	
Background	<p>GRB10 interacting GYF protein 2(GIGYF2) Homo sapiens This gene contains CAG trinucleotide repeats and encodes a protein containing several stretches of polyglutamine residues. The encoded protein may be involved in the regulation of tyrosine kinase receptor signaling. This gene is located in a chromosomal region that was genetically linked to Parkinson disease type 11, and mutations in this gene were thought to be causative for this disease. However, more recent studies in different populations have been unable to replicate this association. Alternative splicing results in multiple transcript variants. [provided by RefSeq, May 2013],</p>
