

HGFL Polyclonal Antibody

Cat No: HR1AP12360

For research use only

Overview

Product Name	HGFL Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human,Mouse
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	78kDa
GeneID?Human?	MST1 D3F15S2 DNF15S2 HGFL
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	
Background	<p>macrophage stimulating 1(MST1) Homo sapiens The protein encoded by this gene contains four kringle domains and a serine protease domain, similar to that found in hepatic growth factor. Despite the presence of the serine protease domain, the encoded protein may not have any proteolytic activity. The receptor for this protein is RON tyrosine kinase, which upon activation stimulates ciliary motility of ciliated epithelial lung cells. This protein is secreted and cleaved to form an alpha chain and a beta chain bridged by disulfide bonds. [provided by RefSeq, Jan 2010].</p>
