

HBE Polyclonal Antibody

Cat No: HR1AP12064

For research use only

Overview

Product Name	HBE Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	16kDa
GeneID?Human?	HBE1 HBE
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	
Background	<p>hemoglobin subunit epsilon 1(HBE1) Homo sapiens The epsilon globin gene (HBE) is normally expressed in the embryonic yolk sac: two epsilon chains together with two zeta chains (an alpha-like globin) constitute the embryonic hemoglobin Hb Gower I; two epsilon chains together with two alpha chains form the embryonic Hb Gower II. Both of these embryonic hemoglobins are normally supplanted by fetal, and later, adult hemoglobin. The five beta-like globin genes are found within a 45 kb cluster on chromosome 11 in the following order: 5'ε-G-γ-A-δ-beta-3'; [provided by RefSeq, Jul 2008],</p>
