

## KCNK5 Polyclonal Antibody

Cat No: HR1AP11133

For research use only

### Overview

Product Name	KCNK5 Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	54kDa
GeneID?Human?	KCNK5 TASK2
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	
Background	<p>potassium two pore domain channel subfamily K member 5(KCNK5) Homo sapiens This gene encodes one of the members of the superfamily of potassium channel proteins containing two pore-forming P domains. The message for this gene is mainly expressed in the cortical distal tubules and collecting ducts of the kidney. The protein is highly sensitive to external pH and this, in combination with its expression pattern, suggests it may play an important role in renal potassium transport. [provided by RefSeq, Jul 2008],</p>
