

KCTD7 Polyclonal Antibody

Cat No: HR1AP9949

For research use only

Overview

Product Name	KCTD7 Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human,Mouse,Rat
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	33kDa
GeneID?Human?	KCTD7
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	BTB/POZ domain-containing protein KCTD7
Background	<p>potassium channel tetramerization domain containing 7(KCTD7) Homo sapiens This gene encodes a member of the potassium channel tetramerization domain-containing protein family. Family members are identified on a structural basis and contain an amino-terminal domain similar to the T1 domain present in the voltage-gated potassium channel. Mutations in this gene have been associated with progressive myoclonic epilepsy-3. Alternative splicing results in multiple transcript variants.[provided by RefSeq, Jan 2011],</p>
