

## RAGE Polyclonal Antibody

Cat No: HR1AP6124

For research use only

### Overview

Product Name	RAGE Polyclonal Antibody
Source	Rabbit
Applications	WB,IHC-p,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	37kDa
GeneID?Human?	AGER
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	AGER; RAGE; Advanced glycosylation end product-specific receptor; Receptor for advanced glycosylation end products
Background	advanced glycosylation end-product specific receptor(AGER) Homo sapiens The advanced glycosylation end product (AGE) receptor encoded by this gene is a member of the immunoglobulin superfamily of cell surface receptors. It is a multiligand receptor, and besides AGE, interacts with other molecules implicated in homeostasis, development, and inflammation, and certain diseases, such as diabetes and Alzheimer's disease. Many alternatively spliced transcript variants encoding different isoforms, as well as non-protein-coding variants, have been described for this gene (PMID:18089847). [provided by RefSeq, May 2011],
